

## Solving Most Mental Problems with Neuroliminal Training

In 2010, I developed and tested with volunteers, a "Special" NT CD. The earlier NT CD's proved the facts as shown in numerous testimonials and studies and the newer "Special" NT is now proving even more effective in helping to solve many and different health problems for many and different persons. The new "Special" NT CD along with the accompanying 4 page article has been effective in either solving or assisting the following:

Depression and Schizophrenia - CD (allergy stress) plus toxic minerals removal

Insomnia and Anxiety - CD (allergy stress plus PTSD)

Epilepsy - 2 cases in Australia solved in 60 days.

Fibromyalgia, Chronic Pain, Arthritis - Mostly allergy stress, but PTSD also.

In 2001, Dr Jiri Tyrl of the Czech Biofeedback Society published papers about EEG biofeedback that showed studies of most of the above mental diseases as being either cured or greatly improved by this feedback.

Neuroliminal Training has proven that it is as good or better than Neurofeedback and only a fraction of that cost.

For only one comparison - ADD/ADHD cases are solved in about 60 days with either therapy; but the average cost for Neurofeedback is \$6000 - NT costs \$147, and has none of the disadvantages of NFB.

Neither NFB or NT are "fast" or immediate relief, as both affect the "unconscious mind", and that "entity" does not make immediate changes.
